Miniature Preziose - Renaissance necklace

18kt gold and black enamel

The Renaissance is an exquisite replica of the famous Salvatore Ferragamo shoe inspired by the sciapin, a high-soled wooden shoe from the Renaissance period which is considered to be the first high heeled shoe. Made of 18kt gold and shiny black enamel, this pendant closely reproduces all the details of the 1938 shoe, highlighting its spectacular and eclectic design.

The Miniature Preziose collection is composed by a series of pendants that faithfully reproduce the most iconic shoes created by Salvatore Ferragamo from the '30s to the '60s.

All of the Miniature Preziose show an extraordinary level of detail that makes this collection unique: the futurista label created for Ferragamo by Lucio Venna is clearly visible in the inside of each shoe, while the name of the model and the date of its creation are both engraved on the soles.
